

stone doors

doors as unique as you

The special is our commitment.

Creating a unique entry door for your home poses special challenges in terms of design, security, heat insulation, functionality and durability.

TUEREN-ART guarantees these qualities in the doors it designs and manufactures.

Design conveys beauty and value, and is an expression of one's own personality. Our TUERENART doors reflect the highest standards of aesthetics with designs of timeless beauty. Millions of years of Earth's history lend each one of our doors its own unique character, combining timeless elegance with the benefits of a highly compressed mineral. Each and every one of our doors features a totally unique design – no two are exactly the same.

Security is one of the most important attributes in the quality of the doors we make. Security begins with standards, which is why all our doors come equipped with a stainless-steel, triplebolt claw lock with enhanced security features. We use a highly insulated, triple-glazed laminated safety glass for the inset. And all safety and locking mechanisms can be integrated – for example, the SafeMatic five-point locking system, fingerprint sensors, and more.

TUEREN-ART entry doors satisfy high-end aesthetic expectations and feature the highest standards of **heat insulation**, indoor climate stability and an airtight seal. TUEREN-ART products meet all the latest insulation standards, and our Avantgarde line complies with Passive House standards.

We guarantee genuine **“Made in Germany”** quality craftsmanship. Meticulous manufacturing processes and comprehensive quality controls ensure that every TUEREN-ART door that leaves our workshop is in immaculate condition.

On the following pages, we'll show you examples of the beauty, elegance, diversity and unique properties of our products. We hope you'll find the inspiration you seek to design and implement a unique entrance into your home.

Christian Tasch
TUEREN-ART

Dem Besonderen verpflichtet.

Eine exklusive Haustür setzt besondere Anforderungen an das Design, an die Sicherheit, an Wärmedämmung, Funktion und Langlebigkeit.

Als Konstrukteur und Entwickler garantiert TUEREN-ART Ihnen diese Eigenschaften.

Design vermittelt Schönheit und Wertigkeit und ist Ausdruck der eigenen Persönlichkeit. Der höchste Anspruch an Ästhetik und zeitlos schönen Design spiegelt sich in unseren TUEREN-ART Haustüren wider. Millionen Jahre Erdgeschichte geben jeder Tür einen einzigartigen Charakter und verbinden somit zeitlose Eleganz mit den Vorteilen eines hochkomprimierten Minerals. Jede Tür ist in ihrem Aussehen einzigartig und stets ein Unikat.

Die **Sicherheit** Ihrer Haustür ist eines unserer wichtigsten Qualitätsmerkmale. Sicherheit fängt bereits beim Standard an, weswegen alle unsere Türen mit einem 3-Riegel-Krallenschloss aus Edelstahl mit erhöhter Sicherheit ausgestattet sind. Bei der Auswahl des Glaseinsatzes verwenden wir eine hoch gedämmte Verbundsicherheitsisolierverglasung aus 3-fach Glas. Darüber hinaus sind sämtliche Sicherheits- und Schließmechanismen integrierbar, z.B. 5- Riegelfallenschloss - "SafeMatic", Fingerprint.

TUEREN-ART Haustüren verbinden gehobene ästhetische Erwartungen mit höchsten Ansprüchen in punkto **Wärmedämmung**, Klimastabilität und Luftdichtheit. Unsere Haustüren erfüllen die heutigen Erwartungen moderner Wärmedämmung umfassend. So sind Haustüren der Avantgarde-Line von TUEREN-ART passivhaustauglich.

Wie garantieren echte deutsche Qualitätsarbeit "**Made in Germany**". Die sorgfältige Fertigung und eine umfassende Qualitätsprüfung stellen sicher, dass jede TUEREN-ART Haustür, die unser Haus verlässt, in einem makellosen Zustand ist.

Auf den folgenden Seiten geben wir Ihnen Beispiele der Schönheit und Eleganz sowie der Vielfalt und der Besonderheit unserer Produkte. Gern regen wir damit Ihre Sinne und Wünsche an, Ihren Lebensbereich individuell zu gestalten und zu realisieren.

copper-doors

Kupfertüren

Kupfer ist ein reines Naturprodukt, welches im Laufe von Jahr Millionen auf unserer Erde entstand. TUEREN-ART nutzt seine Eigenschaften und gibt Ihnen die Möglichkeit Kupfertüren mit eigenen Verzierungen oder Logos zu gestalten. Nahezu jedes Design kann entsprechend Ihrer Vorstellungen, eines Fotos oder einer Zeichnung auf die Kupfertüren übertragen werden.

Deutsche Handwerker treiben das Design mit Handarbeit in das Kupferblech ein. Alle Kupfertüren entsprechen somit dem Qualitätssiegel „Made in Germany“.

Die Kupferbleche werden mit dem selben patentierten Verfahren auf die Türen aufgebracht wie die Natursteinplatten. Jedes Kupferblech wird millimetergenau verarbeitet und mit unserem patentierten Verfahren auf eine SCHÜCO-Aluminiumtür aufgebracht, sodass ein Ablösen oder Verwinden der Kupferbleche nicht möglich ist. Entsprechend ihrer Vorstellungen wird die Kupferoberfläche naturbelassen oder patiniert und lackiert.

Copper doors

Copper is a pure, natural product, which has come to exist over the course of millions of years on our earth. TUEREN-ART uses its very special properties and makes it possible for you to apply your own decoration or logos to your copper doors. We are able to apply practically any design to our copper doors, in line with you vision, a photo, or a drawing.

Skilled German craftsmen transfer your design to the sheet copper by hand. Every copper door meets the quality standard “Made in Germany”.

The sheet copper is applied to the doors in the same patented process as the natural stone sheets. Every sheet of copper is processed precisely to the milimetre, and applied to a SCHÜCO aluminium door using our patented process, so that there is no chance the sheet can come loose or warp. The copper sheets can be given a natural finish, or patinated, and painted - as you wish.
